# SMEW PROJECT SUBMISSION

## ➤ STANDARD LISTING PROVIDED BY ANOTHER LEARNER AFTER I RAN ONE OF THEIR USAGE EXAMPLES

The screenshot displays the Snowflake Data Cloud interface. The top navigation bar includes icons for Databases, Shares, Data Marketplace, Warehouses, Worksheets (active), History, Account, Preview App, Partner Connect, Help, and Notifications. A user menu in the top right shows the user 'NOOB' with the role 'ACCOUNTADMIN' and a 'Quit' option.

The main workspace shows a 'New Worksheet' tab. The query editor contains the following SQL query:

```
1 select count(*) from flowers;
2
```

The query has been executed, resulting in 1 row. The 'Results' tab is active, showing the following table:

Row	COUNT(*)
1	4

Below the query editor, there is a 'Data Preview' tab and a 'Filter result...' input field. The 'Columns' dropdown is set to 'COUNT(\*)'.

On the left sidebar, the 'Database Objects' section is expanded, showing the 'OUTGOING' schema. Under the 'Tables' section, the 'FLOWERS' table is listed. Below the tables, it states 'No Views in this Schema' and lists the 'INTL\_DB' database.

In the bottom left corner, there is a section titled 'Types of Flowers' with the text: 'Having information on different and stylish types of flowers that are available in the market'.

## ➤ TWO REQUESTS I SENT TO FELLOW LEARNER

Request Data

The following information will be sent to **Heap**:

Account

OP08192

Email

pprince.rrathore@gmail.com 

Company Name

Indian Festival

Message (optional)

Festival & Cricket are the most indispensable entertainment mediums. Let us merge it and then we can celebrate cricket as a Festival too.

☒ I accept [Snowflake's consumer terms](#) and [Heap's terms of use](#).

Snowflake processes the personal information you provide us in accordance with our [Privacy Notice](#). Snowflake will share your account name OP08192 and email address with Heap. Heap will follow up on your request at this email address. Heap's [Privacy Notice](#) can be found here.

Indian Festival Never (Static Data)

Manage Listing

India is a land of Festivals and Indians celebrate many festivals. It is difficult to remember all the festivals. So, here we are to give insights on the Indian Festival which uses three columns namely date, day, and name to view different Festivals by their name & date in 2021.

The schema used is OUTGOING and the table name is FESTIVAL.

USAGE EXAMPLES

Let's celebrate Holi but don't know when it is? Find it out now.

Displays when is Holi celebrated in India in 2021

```
SELECT DATE, DAY, NAME FROM FESTIVALS  
WHERE NAME = 'Holi';
```

How many Festivals come on 2021 in each day of the Week.

Display the number of festivals in 2021 on each day of the week.

```
SELECT DISTINCT DAY, COUNT(NAME) FROM FESTIVALS  
GROUP BY DAY  
ORDER BY DAY DESC;
```
